

AQUAAIR LAB – Top results for the laboratory: Absolutely germ-free and oil-free compressed air

100% performance. 0% oil.

————— Laboratory applications require a high degree of purity when using compressed air—whether for analyses, quality tests or clean-room production. The focus is, of course, on the secure availability and sustainable cost-effective generation of compressed air. With the screw compressors from AQUAAIR

you cover these requirements optimally: Thanks to innovative technology, the devices operate absolutely oil-free, reliably and, above all, extremely economically. Depending on the application, these systems can save up to 35% energy!

Oil-free compressed air performance - safe, clean, environmentally friendly

————— With compressors from AQUAAIR, there is a guarantee that no oil residue, germs or other impurities will be released into the affected units during compressed air use at all: You work exclusively with water from the ambient air as a natural lubricant. A decisive plus for your applications!

The integrated VFD-Drive pressure control system prevents unnecessary idle times - this results in an enormous saving in energy costs, especially when the compressed air compressor often has to start. It also eliminates the need for post-filtration and lubricant disposal.

The AQUAAIR result: More performance, more efficiency, more sustainable cost savings.

Innovative AQUAAIR technology: *this is how progress works*

———— AQUAAIR offers you high-quality compressors for the compression of atmospheric air. 100% oil-free and demonstrably efficient, reliably even in demanding daily use - the perfect solution for laboratories, research facilities and clean rooms.

Your advantages

- :: Optimally suitable for all [analysis processes and test arrangements](#) where compressed air is required
- :: Automatic avoidance of oil contact - the compressors work exclusively with water from atmospheric air
- :: No contamination by oil particles - [always clean and reliable results](#)
- :: Germfree compressed air without complex filter systems
- :: High-tech Made in Germany
- :: Significant cost savings compared to conventional compressed air systems
- :: Different sizes and designs - the perfect solution for every requirement
- :: [Used in many industries worldwide](#), e.g. in the demanding food and beverage production of well-known manufacturers as well as in medical technology
- :: Low service effort and maximum availability thanks to less maintenance-need components
- :: CO₂ neutral and extremely environmentally friendly

AQUAAIR Information Service

Simply give us a call if you'd like an individual consultation regarding the oil-free compressed air application at your company: +49. (0)821. 99 98 04 60
