

AQUAAIR PAINT – Brilliant performance for perfect painting: Absolutely oil-free compressed air.

100% performance. 0% oil.

For excellent, error-free painting results, professionals need compressed air in the best possible quality and purity. The focus is, of course, on the secure availability and sustainably cost-effective production. Compressed air is used for respiratory equipment, no problem: the compressed air generated by AQUAAIR screw compressors can be certified according to EAB5.0, meets all HACCP criteria and is

therefore also used in hospitals and the demanding food industry. With the screw compressors from AQUAAIR you cover these requirements optimally: thanks to innovative technology, the devices operate absolutely oil-free, reliably and above all extremely economically. Depending on the application, these systems can save up to 35% energy!

Oil-free compressed air performance – safe, clean, environmentally friendly

Oil-free compressors from AQUAAIR meet the most stringent requirements in the field of painting: they deliver clean compressed air and deliver them with constant pressure values to the spray units – which prevents costly reworking of irregularities and ensures excellent results. Oil particles in the painting air are absolutely excluded. The compressors work exclusively with water from the ambient

air as a natural lubricant. A decisive plus for your applications! The integrated VFD-Drive pressure control system prevents unnecessary idle times – this results in an enormous saving in energy costs, especially when the compressed air compressor often has to start. It also eliminates the need for post-filtration and lubricant disposal.

The AQUAAIR result: More performance, more efficiency, more sustainable cost savings.

Innovative AQUAAIR technology: *this is how progress works*

AQUAAIR offers you high-quality compressors for the compression of atmospheric air. 100% oil-free and demonstrable efficiently, while also reliably in demanding daily use - the perfect and universal solution for paint shops.

Your advantages

- :: Ideal for [painting lines, painting stations and rooms](#)
- :: For aerosol spraying guns, compressed air tools and breathing air supply - all with one compressed air system
- :: Automatic avoidance of oil contamination of the compressed air - the compressors work exclusively with water from atmospheric air
- :: Completely silicone-free seals and components, as for example in the mobile area demanded by the manufacturers
- :: Constantly [high and uniform surface quality, gloss degree and reproducibility](#) in painting processes
- :: High-tech Made in Germany
- :: [Significant cost savings](#) compared to conventional compressed air systems
- :: Different sizes and designs available according to requirement
- :: Operated in many industries worldwide, e.g. in the demanding food and beverage production of renowned manufacturers as well as in medical technology
- :: Low service effort and maximum availability thanks to less maintenance-need components
- :: CO₂ neutral and extremely environmentally friendly
